

## **PRODUCT INFORMATION**

**Target** MSP1D1 APOA1 **Synonyms** 

Recombinant human MSP1D1 Protein with N-**Description** 

terminal 6×His tag

**Delivery** In Stock **Uniprot ID** P02647 **Expression Host HEK293** Tag N-6×His tag

Molecular

Storage & Shipping

6×His tag APOA1(Ser79-Gln267) Characterization

The protein has a predicted molecular mass of

23.7 kDa after removal of the signal peptide. The apparent molecular mass of His-MSP1D1 is **Molecular Weight** approximately 15-25 kDa due to glycosylation.

The purity of the protein is greater than 85% as determined by SDS-PAGE and Coomassie blue Purity

staining.

Lyophilized from sterile PBS, pH 7.4. Normally 5 % - 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis Formulation & Reconstitution

for specific instructions of reconstitution. Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not

intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient

temperature.

MSP1D1 (Membrane Scaffold Protein 1D1) is derived from Apolipoprotein A-I (ApoA-I) and is used in the formation of nanodiscs, which are **Background** 

tools for studying membrane proteins in a
