

PRODUCT INFORMATION

Tag C-Flag Tag

Target NK3R

Synonyms HH11, NK-3R, NK3, NK3R, NKR, TAC3R, TAC3RL

DescriptionHuman NK3R full length protein-synthetic

Delivery 6~8weeks
Uniprot ID P29371
Expression Host HEK293

Protein Families Transmembrane, Druggable Genome,

Protein Pathways Peptide GPCRs,

Molecular Weight

The human full length NK3R protein has a MW of

52.2kDa Lyophilized from nanodisc solubilization buffer (20

mM Tris-HCl, 150 mM NaCl, pH 8.0). Normally 5%
- 8% trehalose is added as protectants before
lyophilization. Please see Certificate of Analysis
for coefficients and the second structure of the second structure.

Reconstitution for specific instructions. Do not use solvents with a pH below 6.5 or those containing high concentrations of divalent metal ions (greater

concentrations of divalent metal ions (greater than 5 mM) in subsequent experiments. Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not

Storage & Shipping intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing).

Lyophilized proteins are shipped at ambient

témperature.

This gene belongs to a family of genes that function as receptors for tachykinins. Receptor affinities are specified by variations in the 5'-end of the sequence. The receptors belonging to this family are characterized by interactions with G proteins and 7 hydrophobic transmembrane

regions. This gene encodes the receptor for the tachykinin neurokinin 3, also referred to as neurokinin B. [provided by RefSeq, Jul 2008]
