

## **PRODUCT INFORMATION**

Tag C-Flag Tag **Target** NMDE2

DEE27, EIEE27, GluN2B, MRD6, NMDAR2B, NR2B, **Synonyms** 

NR3, hNR3

Human NMDE2 full length protein-synthetic Description

nanodisc 6~8weeks

**Delivery Uniprot ID** Q13224 **Expression Host HEK293** 

**Protein Families** Ion Channels: Glutamate Receptors

**Protein Pathways** 

Formulation & Reconstitution

Storage & Shipping

**Background** 

The human full length NMDE2 protein has a MW **Molecular Weight** 

of 166.4kDa

Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCl, 150 mM NaCl, pH 8.0). Normally 5% – 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis for specific instructions. Do not use solvents with

a pH below 6.5 or those containing high concentrations of divalent metal ions (greater than 5 mM) in subsequent experiments. Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not

intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient

temperature.

This gene encodes a member of the N-methyl-D-aspartate (NMDA) receptor family within the ionotropic glutamate receptor superfamily. The encoded protein is a subunit of the NMDA receptor ion channel which acts as an agonist binding site for glutamate. The NMDA receptors mediate a slow calcium-permeable component of excitatory synaptic transmission in the central nervous system. The NMDA receptors are heterotetramers of seven genetically encoded, differentially expressed subunits including NR1 (GRIN1), NR2 (GRIN2A, GRIN2B, GRIN2C, or GRIN2D) and NR3 (GRIN3A or GRIN3B). The early

expression of this gene in development suggests a role in brain development, circuit formation, synaptic plasticity, and cellular migration and differentiation. Naturally occurring mutations

within this gene are associated with

neurodevelopmental disorders including autism spectrum disorder, attention deficit hyperactivity disorder, epilepsy, and schizophrenia. [provided by RefSeq, Aug 2017]

Usage Research use only Conjugate Unconjugated
