Cat. No. PME30014

PRODUCT INFORMATION

OSM Target

Synonyms Oncostatin-M;OSM

Recombinant Human Oncostatin M is produced by

our E.coli expression system and the target gene encoding Ala26-Arg221 is expressed with a 6His

tag at the N-terminus.

Delivery In Stock **Uniprot ID** P13725 **Expression Host** E.coli

N-6×His Tag Tag

Molecular Characterization

Description

Not available

Molecular Weight 24.44 KDa

Greater than 95% as determined by reducing **Purity**

Formulation & Reconstitution

Background

Storage & Shipping

Lyophilized from a 0.2 µm filtered solution of 20mMTris-HCl, 1mM EDTA, 200mM NaCl, pH 7.5.

Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing).

Lyophilized proteins are shipped at ambient

temperature.

Oncostatin M (OSM) is a glycoprotein belonging to the interleukin-6 family of cytokines that includes leukemia-inhibitory factor, granulocyte colonystimulating factor, and interleukin 6. OSM encodes a growth regulator, which Inhibits the proliferation of a number of tumor cell lines. It stimulates proliferation of AIDS-KS cells. OSM regulates cytokine production including IL-6 Growth and IL-6 Gr regulates cytokine production, including IL-6, G-CSF and GM-CSF from endothelial cells. OSM is considered as a pleiotropic cytokine that initiates its biological activities through specific cell

surface receptors. The low affinity LIF receptor that shares the similarity of containing protein gp130 has now been identified to be a component of a high- affinity OSM receptor that will transduce OSM signals. OSM has also been shown

to play a role in both pro and anti-inflammatory actions. OSM may also be involved in many biometabolism processes including liver development, haematopoeisis, inflammation, bone formation and destruction and possibly CNS
