Cat. No. FLP120426

PRODUCT INFORMATION

C-Flag&Strep Tag Tag

Target OX2R

Formulation &

Reconstitution

Storage & Shipping

Background

Synonyms ORXR2, OX2R, OXR2

Human OX2R-Strep full length protein-synthetic **Description**

nanodisc **Delivery** 6~8weeks **Uniprot ID** 043614 **Expression Host HEK293**

Protein Families Druggable Genome,

GPCRDB Class A Rhodopsin-like, Neurotrophin & **Protein Pathways**

Receptors,

The human full length OX2R-Strep protein has a **Molecular Weight**

MW of 50.7 kDa

Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCl, 150 mM NaCl, pH 8.0). Normally 5% – 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis for specific instructions. Do not use solvents with

a pH below 6.5 or those containing high concentrations of divalent metal ions (greater than 5 mM) in subsequent experiments. Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not

intended for use within a month, aliquot and store

at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient

temperature.

The protein encoded by this gene is a G-protein coupled receptor involved in the regulation of feeding behavior. The encoded protein binds the hypothalamic neuropeptides orexin A and orexin

B. A related gene (HCRTR1) encodes a G-protein coupled receptor that selectively binds orexin A. [provided by RefSeq, Jan 2009]
