

PRODUCT INFORMATION

| | |
|---|---|
| Target | PGLYRP1 |
| Synonyms | PGRP-S;PGRPS;PGLYRP;PGRP;TNFSF3L |
| Description | Recombinant human PGLYRP1 protein with C-terminal 6×His tag |
| Delivery | In Stock |
| Uniprot ID | O75594 |
| Expression Host | HEK293 |
| Tag | C-6×His Tag |
| Molecular Characterization | PGLYRP1(Gln22-Pro196) 6×His tag |
| Molecular Weight | The protein has a predicted molecular mass of 20.3 kDa after removal of the signal peptide. The apparent molecular mass of PGLYRP1-His is approximately 15-25 kDa due to glycosylation. |
| Purity | The purity of the protein is greater than 85% as determined by SDS-PAGE and Coomassie blue staining. |
| Formulation & Reconstitution | Lyophilized from sterile PBS, pH 7.4. Normally 5 % - 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis for specific instructions of reconstitution. |
| Storage & Shipping | Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient temperature. |
| Background | Pattern receptor that binds to murein peptidoglycans (PGN) of Gram-positive bacteria. Has bactericidal activity towards Gram-positive bacteria. May kill Gram-positive bacteria by interfering with peptidoglycan biosynthesis. Binds also to Gram-negative bacteria, and has bacteriostatic activity towards Gram-negative bacteria. Plays a role in innate immunity.[UniProtKB/Swiss-Prot Function] |
| Usage | Research use only |
