

PRODUCT INFORMATION

C-Flag&Strep Tag Tag

Target PITC1

M-RDGB-beta, MRDGBbeta, RDGB-BETA, RDGBB, **Synonyms**

RDGBB1

Human PITC1-Strep full length protein-synthetic Description

nanodisc

Delivery 6~8weeks **Uniprot ID** Q9UKF7 HFK293 **Expression Host**

Protein Families Ion Channels: Other

Protein Pathways

Formulation &

Reconstitution

Background

The human full length PITC1-Strep protein has a **Molecular Weight**

MW of 38.4 kDa

Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCl, 150 mM NaCl, pH 8.0). Normally 5% – 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis for specific instructions. Do not use solvents with

a pH below 6.5 or those containing high concentrations of divalent metal ions (greater than 5 mM) in subsequent experiments. Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not

intended for use within a month, aliquot and store Storage & Shipping at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient

temperature.

This gene encodes a member of the phosphatidylinositol transfer protein family. The encoded cytoplasmic protein plays a role in multiple processes including cell signaling and lipid metabolism by facilitating the transfer of phosphatidylinositol between membrane compartments. Alternatively spliced transcript

variants encoding multiple isoforms have been observed for this gene, and a pseudogene of this gene is located on the long arm of chromosome 1. [provided by RefSeq, May 2012]
