

## **PRODUCT INFORMATION**

C-Flag&Strep Tag Tag

**PLLP Target** 

PMLP, TM4SF11 **Synonyms** 

Human PLLP-Strep full length protein-synthetic **Description** 

nanodisc **Delivery** 6~8weeks **Uniprot ID** Q9Y342 **Expression Host HEK293** 

**Protein Families** Ion Channels: Other

**Protein Pathways** N/A

Storage & Shipping

The human full length PLLP-Strep protein has a **Molecular Weight** 

MW of 20 kDa

mM Tris-HCl, 150 mM NaCl, pH 8.0). Normally 5% - 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis Formulation & Reconstitution for specific instructions. Do not use solvents with

a pH below 6.5 or those containing high concentrations of divalent metal ions (greater than 5 mM) in subsequent experiments. Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not

intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing).

Lyophilized from nanodisc solubilization buffer (20

Lyophilized proteins are shipped at ambient

témperature.

Appears to be involved in myelination. Could also participate in ion transport events as addition of plasmolipin to lipid bilayers induces the formation **Background** of ion channels, which are voltage-dependent and

K( )-selective (By similarity).[UniProtKB/Swiss-Prot
