PRODUCT INFORMATION

Target	PROKR1
Synonyms	GPR73;GPR73a;PK-R1;PKR1;ZAQ
Description	Recombinant Human PROKR1 Protein with C-terminal human Fc tag
Delivery	In Stock
Uniprot ID	Q8TCW9
Expression Host	HEK293
Tag	C-Human Fc Tag
Molecular Characterization	PROKR1(Met1-Lys62) hFc(Glu99-Ala330)
Molecular Weight	The protein has a predicted molecular mass of 33.1 kDa after removal of the signal peptide. The apparent molecular mass of PROKR1-hFc is approximately 35-70 kDa due to glycosylation.
Purity	The purity of the protein is greater than 95% as determined by SDS-PAGE and Coomassie blue staining.
Formulation & Reconstitution	Lyophilized from sterile PBS, pH 7.4. Normally 5 % – 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis for specific instructions of reconstitution.
Storage & Shipping	Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient temperature.
Background	This gene encodes a member of the G-protein-coupled receptor family. The encoded protein binds to prokineticins (1 and 2), leading to the activation of MAPK and STAT signaling pathways. Prokineticins are protein ligands involved in angiogenesis and inflammation. The encoded protein is expressed in peripheral tissues such as those comprising the circulatory system, lungs, reproductive system, endocrine system and the gastrointestinal system. The protein may be involved in signaling in human fetal ovary during initiation of primordial follicle formation. Sequence variants in this gene may be associated with recurrent miscarriage. [provided by RefSeq, Aug 2016]
Usage	Research use only
Conjugate	Unconjugated
