## PRODUCT INFORMATION

| Target | PVRIG |
| :---: | :---: |
| Synonyms | CD112R; C7orf15 |
| Description | Recombinant human PVRIG(53-150) Protein with C-terminal human Fc tag |
| Delivery | In Stock |
| Uniprot ID | Q6DKI7 |
| Expression Host | HEK293 |
| Tag | C-Human Fc tag |
| Molecular Characterization | PVRIG(Thr53-Leu150) hFc(Glu99-Ala330) |
| Molecular Weight | The protein has a predicted molecular mass of 36.3 kDa after removal of the signal peptide. The apparent molecular mass of PVRIG(53-150)-hFc is approximately $35-55 \mathrm{kDa}$ due to glycosylation. |
| Purity | The purity of the protein is greater than $95 \%$ as determined by SDS-PAGE and Coomassie blue staining. |
| Formulation \& Reconstitution | Lyophilized from sterile PBS, pH 7.4. Normally 5 \% $-8 \%$ trehalose is added as protectants before Iyophilization. Please see Certificate of Analysis for specific instructions of reconstitution. Store at $-20^{\circ} \mathrm{C}$ to $-80^{\circ} \mathrm{C}$ for 12 months in lyophilized form. After reconstitution, if not |
| Storage \& Shipping | intended for use within a month, aliquot and store at $-80^{\circ} \mathrm{C}$ (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient temperature. |
| Background | Enables phosphatase binding activity and signaling receptor activity. Involved in negative regulation of $T$ cell receptor signaling pathway. Located in plasma membrane. [provided by Alliance of Genome Resources, Apr 2022] |
| Usage | Research use only |
