

PRODUCT INFORMATION

C-Flag&Strep Tag Tag

RXFP1 **Target**

Expression Host

Formulation &

Storage & Shipping

Synonyms LGR7, RXFPR1

Human RXFP1-Strep full length protein-synthetic **Description**

nanodisc **Delivery** 6~8weeks **Uniprot ID** Q9HBX9

Protein Families GPCR, Transmembrane, Druggable Genome,

GPCRDB Other, Smooth muscle **Protein Pathways** contraction, Metabolic and Obesity,

HEK293

The human full length RXFP1-Strep protein has a **Molecular Weight**

MW of 87 kDa

Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCl, 150 mM NaCl, pH 8.0). Normally 5% – 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis for specific instructions. Do not use solvents with

Reconstitution a pH below 6.5 or those containing high concentrations of divalent metal ions (greater than 5 mM) in subsequent experiments.

Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store

at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient

temperature.

This gene encodes a member of the leucine-rich repeat-containing subgroup of the G proteincoupled 7-transmembrane receptor superfamily. The encoded protein plays a critical role in sperm motility, pregnancy and parturition as a receptor

for the protein hormone relaxin. Decreased **Background** expression of this gene may play a role in

endometriosis. Alternatively spliced transcript variants encoding multiple isoforms have been observed for this gene. [provided by RefSeq, Dec

20111

Usage Research use only

Conjugate Unconjugated
