

## **PRODUCT INFORMATION**

Tag C-Flag&Strep Tag

**Target SMO** 

Storage & Shipping

**Background** 

**Synonyms** CRJS, FZD11, Gx, PHLS, SMOH

Human SMO-Strep full length protein-synthetic **Description** 

nanodisc **Delivery** 6~8weeks **Uniprot ID** Q99835 **Expression Host HEK293** 

ES Cell Differentiation/IPS ,Transmembrane,Stem cell relevant signaling – DSL/Notch

**Protein Families** pathway, Druggable Genome,

GPCRDB Other, Hedgehog Netpath 10, Hedgehog **Protein Pathways** 

Netpath 10, Apoptosis, Cancer, Notch,

The human full length SMO-Strep protein has a **Molecular Weight** 

MW of 86.4 kDa

Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCl, 150 mM NaCl, pH 8.0). Normally 5% - 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis

Formulation & for specific instructions. Do not use solvents with Reconstitution a pH below 6.5 or those containing high concentrations of divalent metal ions (greater

than 5 mM) in subsequent experiments. Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not

intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing).

Lyophilized proteins are shipped at ambient

témperature.

The protein encoded by this gene is a G proteincoupled receptor that interacts with the patched protein, a receptor for hedgehog proteins. The encoded protein tranduces signals to other proteins after activation by a hedgehog

protein/patched protein complex. [provided by RefSeq, Jul 2010]

Usage Research use only Conjugate Unconjugated
