

PRODUCT INFORMATION

Tag C-Flag&Strep Tag

Target STING1

Synonyms ERIS; hMITA; hSTING; MITA; MPYS; NET23; SAVI;

STING; STING-beta; TMEM173

DescriptionHuman STING1-Strep full length protein-synthetic

nanodisc 6~8weeks

Delivery 6~8weeks
Uniprot ID Q86WV6
Expression Host HEK293

Formulation &

Reconstitution

Background

Protein Families Transmembrane

Protein Pathways Cytosolic DNA-sensing pathway, RIG-I-like

receptor signaling pathway

Molecular Weight
The human full length STING1-Strep protein has a

MW of 42.2 kDa

Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCl, 150 mM NaCl, pH 8.0). Normally 5% – 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis for specific instructions. Do not use solvents with

for specific instructions. Do not use solvents with a pH below 6.5 or those containing high concentrations of divalent metal ions (greater than 5 mM) in subsequent experiments.

Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not

Storage & Shipping intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient

temperature.

A five transmembrane protein that functions as a major regulator of the innate immune response to viral and bacterial infections. The encoded protein is a pattern recognition receptor that detects cytosolic nucleic acids and transmits signals that activate type I interferon responses. The encoded protein has also been shown to play a role in apoptotic signaling by associating with type II

apoptotic signaling by associating with type II major histocompatibility complex. Mutations in this gene are the cause of infantile-onset STING-associated vasculopathy. Alternate splicing results in multiple transcript variants

results in multiple transcript variants.

Usage Research use only
Conjugate Unconjugated
