Cat. No. FLP100483

## **PRODUCT INFORMATION**

C-Flag Tag Tag TAAR5 **Target** 

**Synonyms** PNR, taR-5

Human TAAR5 full length protein-synthetic **Description** 

nanodisc **Delivery** 6~8weeks **Uniprot ID** 014804 **Expression Host HEK293** 

**Protein Families** GPCR, Transmembrane, Druggable Genome,

**Protein Pathways** GPCRDB Other,

The human full length TAAR5 protein has a MW of **Molecular Weight** 

38.2kDa Lyophilized from nanodisc solubilization buffer (20

mM Tris-HCl, 150 mM NaCl, pH 8.0). Normally 5% - 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis

Formulation & Reconstitution for specific instructions. Do not use solvents with a pH below 6.5 or those containing high

concentrations of divalent metal ions (greater than 5 mM) in subsequent experiments. Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store

Storage & Shipping at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient

temperature.

Olfactory receptor specific for trimethylamine, a trace amine. Also activated at lower level by dimethylethylamine. Trimethylamine is a bacterial metabolite found in some animal odors,

and to humans it is a repulsive odor associated with bad breath and spoiled food. This receptor is probably mediated by the G(s)-class of G-proteins which activate adenylate

cyclase.[UniProtKB/Świss-Prot Function]

**Usage** Research use only Conjugate Unconjugated

**Background**
