

## **PRODUCT INFORMATION**

C-Flag Tag Tag TRPM3 **Target** 

**Synonyms** GON-2, LTRPC3, MLSN2

Human TRPM3 full length protein-synthetic **Description** 

nanodisc **Delivery** 6~8weeks **Uniprot ID** Q9HCF6 **Expression Host HEK293** 

**Protein Families** Ion Channels: Transient receptor potential

**Protein Pathways** N/A

Storage & Shipping

**Background** 

The human full length TRPM3 protein has a MW of **Molecular Weight** 

197.6kDa

mM Tris-HCl, 150 mM NaCl, pH 8.0). Normally 5% - 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis Formulation & Reconstitution for specific instructions. Do not use solvents with

a pH below 6.5 or those containing high concentrations of divalent metal ions (greater than 5 mM) in subsequent experiments. Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not

Lyophilized from nanodisc solubilization buffer (20

intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient

temperature.

The product of this gene belongs to the family of transient receptor potential (TRP) channels. TRP channels are cation-selective channels important for cellular calcium signaling and homeostasis. The protein encoded by this gene mediates calcium entry, and this entry is potentiated by calcium store depletion. Alternatively spliced transcript varieties of loss deferent isoforms

have been identified. [provided by RefSeq, Jul
