

PRODUCT INFORMATION

| | |
|-------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Target | BCMA, BTN3A1, CD138, CD147, CD30, CD33, CD38, CD47, CD63, CD99, CS1, GITR, GPC1, GPRC5D, ICAM-1, MUC1, PDL-1, SELPLG, TFR3, TIM3 |
| Description | The embedded and sliced tumor sections (4µm section) from M-NSG mice implanted with RPMI-8226 cells |
| Host Cells | RPMI 8226 |
| Applications | IHC |
| Host mice | M-NSG |
| Delivery | 1 week |
| Guarantee | 36 months from the date of manufacture |
| Background | These carefully prepared tissue slides offer researchers standardized and high quality samples for antibody testing. Utilizing tumor models derived from immunocompromised mice, researchers can confidently assess antibody specificity and sensitivity, driving advancements in cancer diagnostics and therapeutics. |
| Storage & Shipping | Room temperature |
| Usage | Research use only |

Figure 1. IHC analysis of M-NSG RPMI-8226 DiSliceX™ SlideSet section (Cat. No. SLI100001) with anti-CD99 antibody (DM203); Rabbit mAb (Cat. No. DME100203) at a concentration of 10 µg/ml. The inset image shows the absence of staining in secondary antibody-only control.
