

PRODUCT INFORMATION

| | |
|---|---|
| Target | SLITRK6 |
| Synonyms | Sltk6; 4832410J21Rik |
| Description | Recombinant mouse SLITRK6 protein with C-terminal 10×His tag |
| Delivery | In Stock |
| Uniprot ID | Q8C110 |
| Expression Host | HEK293 |
| Tag | C-10×His tag |
| Molecular Characterization | Mouse SLITRK6(Pro23-Val608) 10×His tag |
| Molecular Weight | The protein has a predicted molecular mass of 66.6 kDa after removal of the signal peptide. |
| Purity | The purity of the protein is greater than 80% as determined by SDS-PAGE and Coomassie blue staining. |
| Formulation & Reconstitution | Lyophilized from sterile PBS, pH 7.4. Normally 5 % - 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis for specific instructions of reconstitution. |
| Storage & Shipping | Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient temperature. |
| Background | Acts upstream of or within several processes, including linear vestibuloocular reflex; nervous system development; and sensory organ development. Located in cell periphery. Is expressed in several structures, including brain; gut; limb bud; lung; and sensory organ. Used to study sensorineural hearing loss. Human ortholog(s) of this gene implicated in high myopia-sensorineural deafness syndrome. Orthologous to human SLITRK6 (SLIT and NTRK like family member 6). [provided by Alliance of Genome Resources, Apr 2022] |
| Usage | Research use only |
