

PRODUCT INFORMATION

Clone ID DM192 **Target** ADAM9

CORD9; MCMP; MDC9; Mltng **Synonyms**

Host Species Rabbit

PE-conjugated Anti-ADAM9 antibody(DM192); Description

Rabbit mAb

Delivery Under Development

Uniprot ID Q13443 Rabbit IgG IgG type Clonality Monoclonal Reactivity Human **Applications** Flow Cyt

Recommended Flow Cyt 1:100 **Dilutions**

Formulation &

Purified from cell culture supernatant by affinity **Purification**

chromatography

Liquid PBS with 0.05% Proclin300, 1% BSA Reconstitution

Storage & Shipping Store at 2°C-8°C for 6 months

> This gene encodes a member of the ADAM (a disintegrin and metalloprotease domain) family Members of this family are membrane-anchored proteins structurally related to snake venom disintegrins; and have been implicated in a variety of biological processes involving cell-cell

and cell-matrix interactions; including fertilization; muscle development; and

Background neurogenesis. The protein encoded by this gene interacts with SH3 domain-containing proteins;

binds mitotic arrest deficient 2 beta protein; and is also involved in TPA-induced ectodomain shedding of membrane-anchored heparin-binding EGF-like growth factor. Several alternatively spliced transcript variants have been identified

for this gene.

Usage Research use only

Conjugate PE-conjugated

All DIMA recombinant antibodies are genuinely generated by DIMA Biotech. They are all under patent application. Any protein sequencing or

DIMA Disclaimer reverse engineering attempt is prohibited. We are

actively scrutinizing all patent application to ensure no IP infringement.
