

## **PRODUCT INFORMATION**

Clone ID DM104 **CD30 Target** 

TNFRSF8;CD30;D1S166E;Ki-1 **Synonyms** 

**Host Species** 

PE-conjugated Anti-CD30 antibody(DM104); Description

Rabbit mAb

**Delivery Under Development** 

**Uniprot ID** P28908 Rabbit IgG IgG type Clonality Monoclonal Reactivity Human **Applications** Flow Cyt

Recommended Flow Cyt 1:100 **Dilutions** 

Formulation &

**Background** 

Purified from cell culture supernatant by affinity **Purification** 

chromatography

Liquid PBS with 0.05% Proclin300, 1% BSA Reconstitution

Storage & Shipping Store at 2°C-8°C for 6 months

The protein encoded by this gene is a member of the TNF-receptor superfamily. This receptor is expressed by activated; but not by resting; T and B cells. TRAF2 and TRAF5 can interact with this receptor; and mediate the signal transduction that leads to the activation of NE kappap. This that leads to the activation of NF-kappaB. This receptor is a positive regulator of apoptosis; and also has been shown to limit the proliferative

potential of autoreactive CD8 effector T cells and protect the body against autoimmunity. Two alternatively spliced transcript variants of this gene encoding distinct isoforms have been

> Email: info@dimabio.com Website: www.dimabio.com

reported.

Usage Research use only Conjugate PE-conjugated
