

## **PRODUCT INFORMATION**

Clone ID DMC425 **CD63 Target** 

> CD63 antigen; Granulophysin; LAMP-3; Limp1; Melanomaassociated antigen ME491;OMA81H;Ocular melanoma-

associated antigen; Tetraspanin-30; Tspan-30

**Host Species** 

PE-conjugated Anti-CD63 antibody(DMC425); IgG1 Chimeric **Description** 

mAb

Delivery Under Development

P08962 **Uniprot ID** 

IgG type Rabbit/Human Fc chimeric IgG1

Clonality Monoclonal Reactivity Human **Applications** Flow Cyt

Recommended

Formulation &

**Background** 

**DIMA Disclaimer** 

**Synonyms** 

Flow Cyt 1:100 Dilutions

Purified from cell culture supernatant by affinity **Purification** 

chromatography

Reconstitution

Storage & Shipping Store at 2°C-8°C for 6 months

The protein encoded by this gene is a member of the transmembrane 4 superfamily; also known as the tetraspanin family. Most of these members are cell-surface proteins that are characterized by the presence of four hydrophobic domains. The proteins mediate signal transduction events that play a role in the regulation of cell

development; activation; growth and motility. The encoded protein is a cell surface glycoprotein that is known to complex with integrins. It may function as a blood platelet activation marker. Deficiency of this protein is associated with Hermansky-Pudlak syndrome. Also this gene has been associated with tumor progression. Alternative splicing

results in multiple transcript variants encoding different

protein isoforms.

Usage Research use only Conjugate PE-conjugated

All DIMA recombinant antibodies are genuinely generated by DIMA Biotech. They are all under patent application. Any protein sequencing or reverse engineering attempt is
