Cat. No. DME101021P

PRODUCT INFORMATION

Clone ID 1H6 CL2A **Target** N.A. **Synonyms Host Species** Rabbit

PE-conjugated Anti-CL2A(ADC linker) Description

antibody(1H6); Rabbit mAb

Delivery Under Development

Uniprot ID N.A.

Rabbit IgG IgG type Clonality Monoclonal

Reactivity N.A.

Applications Flow Cyt

Recommended

Flow Cyt 1:100 **Dilutions**

Purified from cell culture supernatant by affinity **Purification**

chromatography

Formulation & Reconstitution

Background

Liquid

□PBS with 0.05% Proclin300, 1% BSA

CL2A is a crucial component in antibody-drug

Storage & Shipping Store at 2°C-8°C for 6 months

> conjugate (ADC) therapy, acting as a chemical linker that connects a potent DNA topoisomerase I inhibitor, SN-38, to an antibody. Representing Cysteine-Linked 2-Aminoethyl, CL2A features a complex structure with a PEG8 chain, a triazole ring, a PABC-peptide, and a maleimide group. The maleimide group binds to a cysteine residue on

the antibody, facilitating targeted drug delivery. Designed to release SN-38 in acidic cancer cell environments, CL2A induces DNA damage and cell death. This versatile linker is employed in ADCs targeting various antigens like Trop-2 or

HER2, tailored to specific cancer types.

Usage Research use only

Conjugate PE-conjugated
