Cat. No. DME100162P

## **PRODUCT INFORMATION**

Clone ID DM162 EPHA3 **Target** 

**Synonyms** TYRO4; HEK4; ETK1; ETK; EK4; HEK

**Host Species** 

PE-conjugated Anti-EPHA3 antibody(DM162); Description

Rabbit mAb

**Delivery** Under Development

**Uniprot ID** P29320 Rabbit IgG IgG type Clonality Monoclonal Reactivity Human **Applications** Flow Cyt

Recommended

Flow Cyt 1:100 **Dilutions** 

Purified from cell culture supernatant by affinity **Purification** 

chromatography

Formulation & Reconstitution

**Background** 

**DIMA Disclaimer** 

Liquid PBS with 0.05% Proclin300, 1% BSA

Storage & Shipping Store at 2°C-8°C for 6 months

> This gene belongs to the ephrin receptor subfamily of the protein-tyrosine kinase family. EPH and EPH-related receptors have been implicated in mediating developmental events; particularly in the nervous system. Receptors in the EPH subfamily typically have a single kinase domain and an extracellular region containing a Cys-rich domain and 2 fibronectin type III repeats.

> The ephrin receptors are divided into 2 groups based on the similarity of their extracellular domain sequences and their affinities for binding ephrin-A and ephrin-B ligands. This gene encodes a protein that binds ephrin-A ligands. Two alternatively spliced transcript variants have been

described for this gene.

**Usage** Research use only

Conjugate PE-conjugated
