

PRODUCT INFORMATION

Clone ID 1A2 **IFNG Target**

Synonyms IFN-gamma;Immune interferon

Host Species

PE-conjugated Anti-IFNG antibody(1A2), IgG1 Chimeric mAb Description

Delivery 3-4 weeks **Uniprot ID** P01579

IgG type Rabbit/Human Fc chimeric IgG1

Clonality Monoclonal Reactivity Human **Applications** Flow Cyt

Recommended

Flow Cyt 1:100 **Dilutions**

Purified from cell culture supernatant by affinity **Purification**

chromatography

Formulation & Reconstitution

Background

Liquid PBS with 0.05% Proclin300, 1% BSA

Storage & Shipping Store at 2°C-8°C for 6 months

IFNy is the major interferon produced by mitogenically or antigenically stimulated lymphocytes. It is structurally different from type

I interferon and its major activity is immunoregulation. It has been implicated in the expression of class II histocompatibility antigens

in cells that do not normally produce them, leading to autoimmune disease. Interferon gamma is produced mainly byT-cells and natural killer cells activated by antigens, mitogens, or alloantigens. It is produced by lymphocytes expressing the surface antigens CD4 and CD8. IFNy synthesis is induced by IL-2, FGF-basic, and
